

Dear Sirs:

I am respectfully submitting my request that you reject the NAB's petition 04-160.

I am a long haul truck driver and frequently depend on the traffic and weather channels on my xm radio. Regularily, the local stations do not transmit traffic and weather in a timely manner, making it difficult to decide routes and other driving decisions necessary when crossing the USA.

I regularly find myself tuning to the weather and traffic information available on my xm radio. I find that by having the information available around the clock, and available when I am in need of it tremendously helpful in avoiding storms, traffic jams and road construction.

I continue to urge you to reject the NAB's petition 04-160.

Sincerely,

James Buwalda
